📍 Calgary, AB T2R 0S2

Results-driven Software Developer with strong expertise in building scalable, high-performance web applications using React, Next.js, TypeScript, and JavaScript. Experienced in developing modern, responsive user interfaces and full-stack applications with a focus on performance, accessibility, and clean architecture.

Proficient in designing and consuming RESTful APIs, building backend services with Node.js, and managing application state efficiently using modern patterns. Hands-on experience with Next.js features such as server-side rendering (SSR), static site generation (SSG), and API routes to build production-ready applications.

Strong foundation in component-driven development, reusable UI systems, and styling with Tailwind CSS, along with version control using Git and deployment on platforms like AWS and Firebase. Adept at optimizing performance, debugging complex issues, and writing maintainable, scalable code in TypeScript.

Collaborative and growth-oriented developer with experience working in Agile environments, translating business requirements into technical solutions, and continuously improving through real-world projects and hands-on learning. Passionate about building impactful products and delivering seamless user experiences.

EDUCATION

Diploma In Software Development
Bow Valley College | Calgary, Alberta
January, 2025 - April, 2026

Expected Graduation: May, 2026.

Current GPA: 3.9

Enthusiastic and results-driven Software Development student at Bow Valley College, passionate about turning ideas into impactful digital experiences. I'm building a strong foundation across modern web and software technologies, with a focus on problem-solving, teamwork, and user-centric design. Driven by curiosity and creativity, I'm eager to learn, grow, and contribute to meaningful, real-world projects.

Uasin Gishu High School | Kenya, Africa
